WOLVERINE—Flesh tinted yellow and lavender.....	.10
YELLOW KID—Clear yellow prim, no marknigs.....	.08
YOUELLS FAVORITE—Rosy lavender pink.....	.15

Having a surplus of the following varieties in $\frac{3}{4}$ to $1\frac{1}{4}$ -inch sizes we will sell them while they last at \$1.25 per 100 delivered.

They are all young bulbs and will give fine blooms and a wonderful harvest of bulbs—

Alice Triplady, Arlon, Butterfly, Bright Light, Dorothy Wheeler, Jack Jr., Maidens Blush, Myra, Nora, Peace, Princepine, Sentinel, and Yellow Kid.

Cultural Directions

If your garden does not contain "Glads" you are missing one floral treat. Their certainty to bloom, ease of culture, and lasting qualities as cut flowers are not surpassed by any.

No other summer blooms are as attractive and useful for decorations. Their large, perfect flowers, borne on tall, graceful spikes often have twenty or more buds, all of which will blossom and give you a beautiful bouquet for ten days or more, if the wilted flowers are removed and fresh water given each day.

Plant in the sun (and not where the roots of trees or shrubbery sap the ground) four to five inches deep and three to eight inches apart in rows; use well rotted manure or good potato fertilizer thoroughly mixed with the soil.

When cutting flowers leave four or five leaves to help mature the new bulbs; dig when the leaves begin to turn lighter in color or when a brown skin shows on top of the new bulb; cut tops close to the bulbs and allow them to dry in the sun for a few days.

Break off the roots and old dried bulb before storing them in a dry, cool cellar free from frost), in shallow boxes or trays not over six inches deep.

Save the small bulblets and plant (to increase your stock) early next spring, as you would peas—two inches deep; harvest same as blooming bulbs, plant again the next season and you will have some nice blooms, and the next year they will be at their best.

No orders accepted for less than \$1.00.

All offerings are made subject to prior sale.

Orders sent post-paid anywhere in the United States.

Remittances must accompany order.

We use care to have bulbs packed true to name, and will replace free, or refund money on any that prove untrue.

TO OUR "GLAD" FRIENDS:

All our "Glad" friends should get together and become members of the NEW JERSEY GLADIOLUS SOCIETY, organized last November.

It costs but \$1.00 per year and if you join before May 15th you will become a Charter Member.

At this time the Society has a membership of 200, and hopes are entertained that by May 15th we will have 500.

There is nothing more encouraging in the growing of "Glads" than meeting as one big family, quarterly, as this new Society does, and listening to a good lecture or discussion on the untold qualities, beauty, and possibilities, and the great pleasure derived in growing Gladiolus.

Enclosed is an application blank, which we earnestly hope you will use.

Sincerely yours,

H. M. BARRETT & SON.
